Bharat Goyal

Full-Stack Software Engineer — React, TypeScript, Node.js — AI Product Development

* Bengaluru, India +91-7973342798 goyalbharat9977@gmail.com LinkedIn GitHub LeetCode

Professional Summary

Frontend-led full-stack engineer with **3+ years** building React and TypeScript enterprise SaaS products for **5M+ users**. Expanding end-to-end ownership through Node.js, Fastify, MongoDB, GCP, and AI integrations; built and deployed ForgeFit, an AI fitness-coaching product.

Technical Skills

Frontend: React, TypeScript, JavaScript (ES6+), Next.js, Redux, Tailwind CSS, Material UI, performance optimization
Backend, AI & Cloud: Node.js, Fastify, REST APIs, GraphQL, WebSockets, MongoDB, SQL, Docker, GCP, JWT, Google OAuth, LLM integration, structured outputs, AI safety checks, voice integrations
Engineering: Data Structures & Algorithms, complexity analysis, testing (Jest), CI/CD, Webpack, Sentry, accessibility (WCAG), micro-frontends, monorepos, team leadership

Professional Experience

Kapture CX **Oct 2025 – Present**
Software Development Engineer II, Frontend *Bengaluru, India*

- Lead a team of **3** frontend engineers, owning technical direction, sprint planning, code reviews, and mentorship for enterprise SaaS delivery.
- Helped build a prompt-driven chatbot UI workflow with Handlebars (HBS), cutting typical client turnaround from **2–3 weeks** to approximately **2 days**.
- Contributing to early development of a conversational commerce platform designed to turn natural-language customer requests into interactive, task-specific UI—for example, product comparisons, selection, and transaction flows—using each client's existing components and live data.
- Reduced peak-traffic chatbot frontend latency for a **5M+ MAU** product through profiling, code-splitting, memoization, and Webpack bundle optimization.
- Developed GenAI-powered dashboards and REST API integrations for real-time visualization; improved dashboard load times by **30%** through lazy loading and optimized data fetching.
- Designed configuration-driven, multi-tenant UI systems that reduced customer onboarding time by **30%**, raised application stability by **15%**, and reduced incident cycles by **25%** through Sentry and QA collaboration.

Kapture CX **Dec 2023 – Sep 2025**
Software Development Engineer I, Frontend *Bengaluru, India*

- Engineered React, TypeScript, and Redux Master Data Manager modules supporting workflows for **500K+ enterprise users**.
- Shipped a metadata-driven API configuration UI that decoupled frontend releases from backend changes and accelerated feature rollout cycles by **30%**.
- Revamped performance-critical enterprise interfaces, including Kanoo Travel, delivering **35%** faster page loads through component refactoring, asset optimization, and Webpack tuning.
- Migrated legacy code to React and TypeScript with backend teams; improved WCAG accessibility, cross-browser compatibility, Jest coverage, and CI/CD delivery.

Skillvalley **Aug 2022 – Nov 2023**
Software Development Engineer Intern *Remote*

- Delivered full-stack HR and payroll features using React, Node.js, and MongoDB, reducing payroll processing errors by **45%**.
- Created dashboards, forms, automated reporting, and PDF-generation workflows that reduced manual HR effort by **35%**.

Projects

ForgeFit | *Next.js, React, TypeScript, Fastify, MongoDB, Google OAuth, Docker, GCP* GitHub | Live Product

- Developed and deployed an AI fitness-coaching web product with a Next.js/React frontend, TypeScript Fastify APIs, MongoDB, Google sign-in, Docker, and GCP deployment.
- Designed a provider-neutral AI layer for personalized fitness plans with structured outputs and safety checks, enabling support for multiple model providers.
- Integrated real-time voice coaching with fallback behavior and privacy-aware, on-device pose tracking; documented onboarding improvements for a voice-first experience.

Education & Achievements

Guru Nanak Dev Engineering College **Aug 2018 – Jul 2022**
Bachelor of Technology *Punjab, India*

- GeeksforGeeks JOB-A-THON-12: scored **154.34/174** in a timed Data Structures & Algorithms coding challenge.
- Newton School Triwizard Contest: ranked **759 out of 35,299** participants.
